IT'S a fact. Tanners are not easy to do business with unless you know how to satisfy their very exacting demands—unless you recognize that they know what they want and know how to get what they want.

In oils, for example. Tanners know they cannot turn out a uniformly high quality leather unless they get uniform high quality in oils.

For 63 years Atlas Refinery has found it very easy to do business with tanners because Atlas Oils are made to the most exacting specifications and because every control for quality and uniformity known to the science of oil refining are meticulously applied to the production of Atlas Oils.

Tanners buy Atlas Oils with the confidence born of long known dependability. That confidence is our most valued possession.
